

A woman with dark curly hair, wearing a bright red blazer and dark blue trousers, stands in an office. She is smiling and looking towards the camera while holding a smartphone. The phone is positioned near a white smart locker system. The locker has a digital display showing the time 15:26, the date 22.04.2011, and the text 'Your data center please' and 'Release'. The locker is part of a larger unit with other compartments, some labeled '01' and '04'. In the background, there are large windows with horizontal blinds, offering a view of a city skyline with various buildings. The office interior includes a desk with a keyboard and a chair.

SMART LOCKER SYSTEMS
SOLUTIONS FOR MODERN WORKPLACES

GANTNER – THE MARKET LEADER

SMART LOCKER SYSTEMS

GANTNER implements, optimizes, and simplifies modern office workplaces through innovative smart locker solutions. The employee ID card or smartphone becomes a contactless key replacement – wherever lockers, office furniture, value boxes or postboxes are used.

GANTNER has been a leader in the development of smart locker systems for 40 years. A unique product range enables systems that are perfectly adapted to the customer need.

hardware are both
developed in-house.

FULL-SERVICE

EVERYTHING FROM A SINGLE SOURCE

With GANTNER, you are in the best hands. Our solutions convince through innovation, durability, and reliability.

In collaboration with our partners, we accompany you in all project phases. A broad partner network and professional service team are happy to assist you worldwide.

» Our goal was to integrate a locker system in an office complex with flexible workplaces. The system should create a safe space for our employees to store documents and personal belonging. On a scale from 0 to 10, we can say that our satisfaction with GANTNER is a clear 10. «

Head of Administration, Telia Eesti AS

CHANGING WORK ENVIRONMENTS

NEW REQUIREMENTS FOR MODERN WORKPLACES

Hybrid working, home office, and shared desks are gaining in importance as the leading working concepts. It is vital to develop new forms of collaboration in which employees feel safe and comfortable. For employers, this creates savings of expensive office space, but at the same time, they must develop a suitable concept as an answer to these new workplaces.

New forms of mobility and increased environmental awareness call for innovative solutions. After all, the goal is to attract the best talent with an attractive work environment.

SMART LOCKER SOLUTIONS

FOR MORE FLEXIBILITY AND EFFICIENCY

Easy to operate

The intuitive use via smartphone or employee ID guarantees a high level of acceptance.

Save money & space

An optimized utilization of the workplace and lockers leads to cost savings.

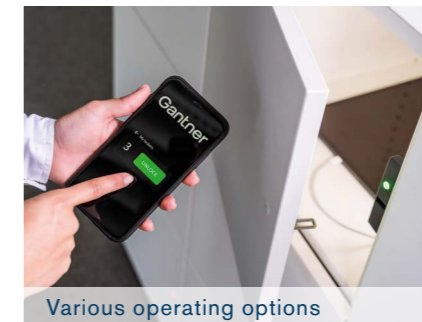

Easy to manage

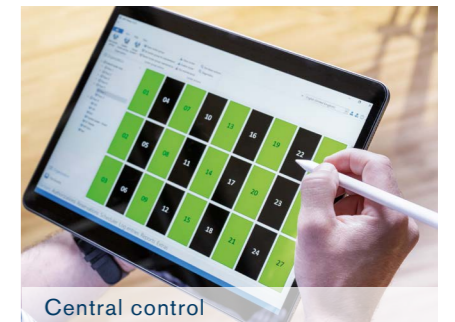

A centrally powered locker system is maintenance-free and enables central control.

Smart locker systems from GANTNER are the basis for the new working concepts. They enable the implementation of new usage concepts for workplaces, free up space, and provide security.

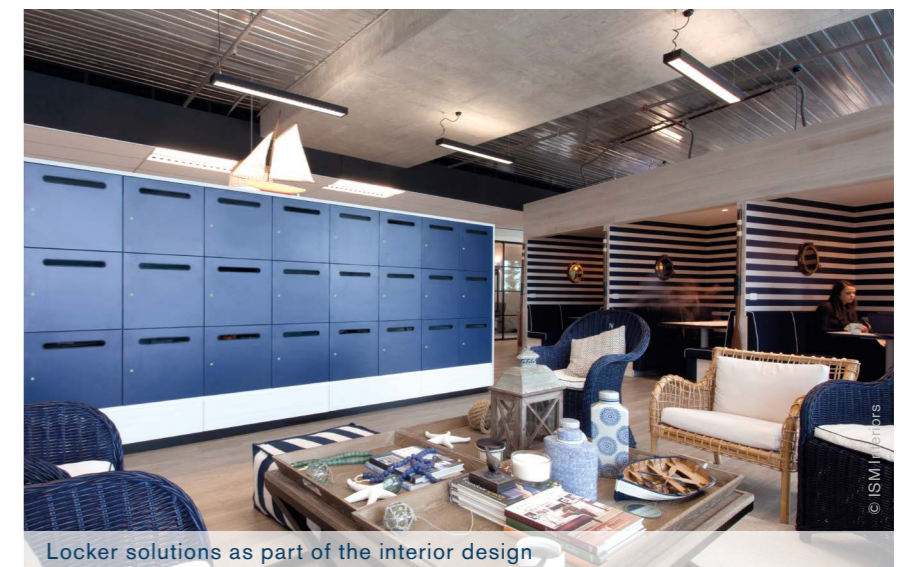

The smart locker solutions are used wherever secure storage options are required: workstations, office floors, changing rooms, or the reception.

SMART OFFICE LOCKER SOLUTIONS FOR INNOVATIVE WORKPLACES

Modern, open office concepts require one thing: secure storage for your employees. At the heart of this are smart locker solutions that give every employee a piece of privacy, security, and convenience. Smart locker solutions are the key to implementing innovative work concepts, where employees freely select desks and companies reduce space.

Flexible use

Change the functionality for different user groups with a click.

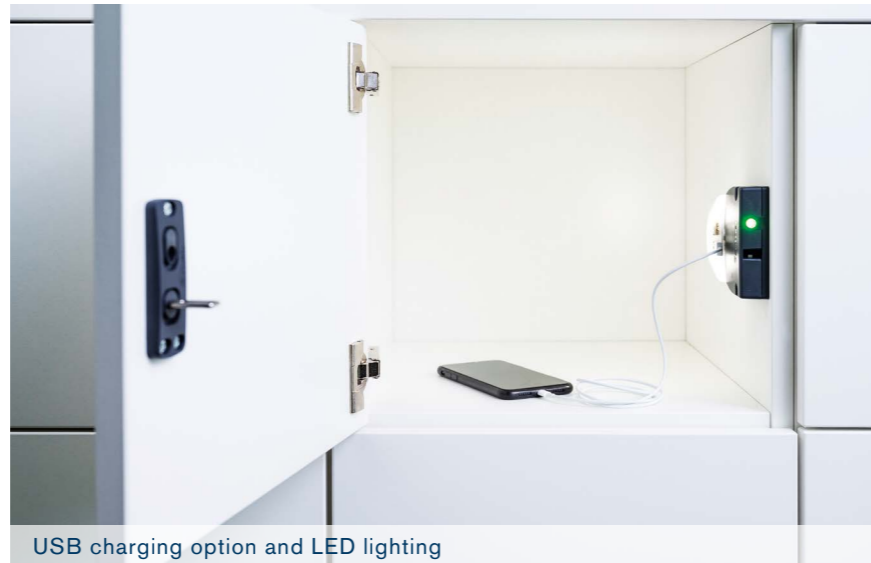

Self-service

Employees manage lockers themselves.

Hygienic

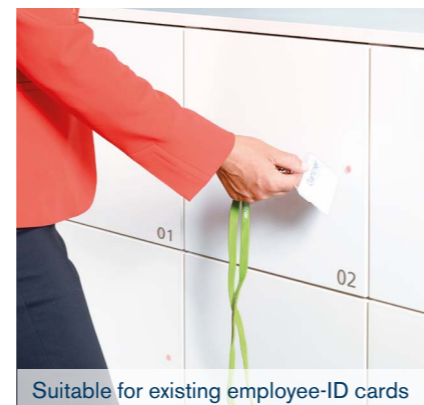

Contactless technology and easy cleaning ensure additional safety.

USB charging option and LED lighting

Self-service terminal

Suitable for existing employee-ID cards

SMART BUILDING INTEGRATED LOCKERS FOR AN EFFICIENT BUILDING MANAGEMENT

The lockers are managed from a central location without effort. Open interfaces guarantee complete integration into other systems. Existing access cards of all common RFID/NFC standards can be used. As a result, smart locker systems ensure high-performing, efficient and safe work processes.

Full integration

The locker system is part of the access system or a workplace app.

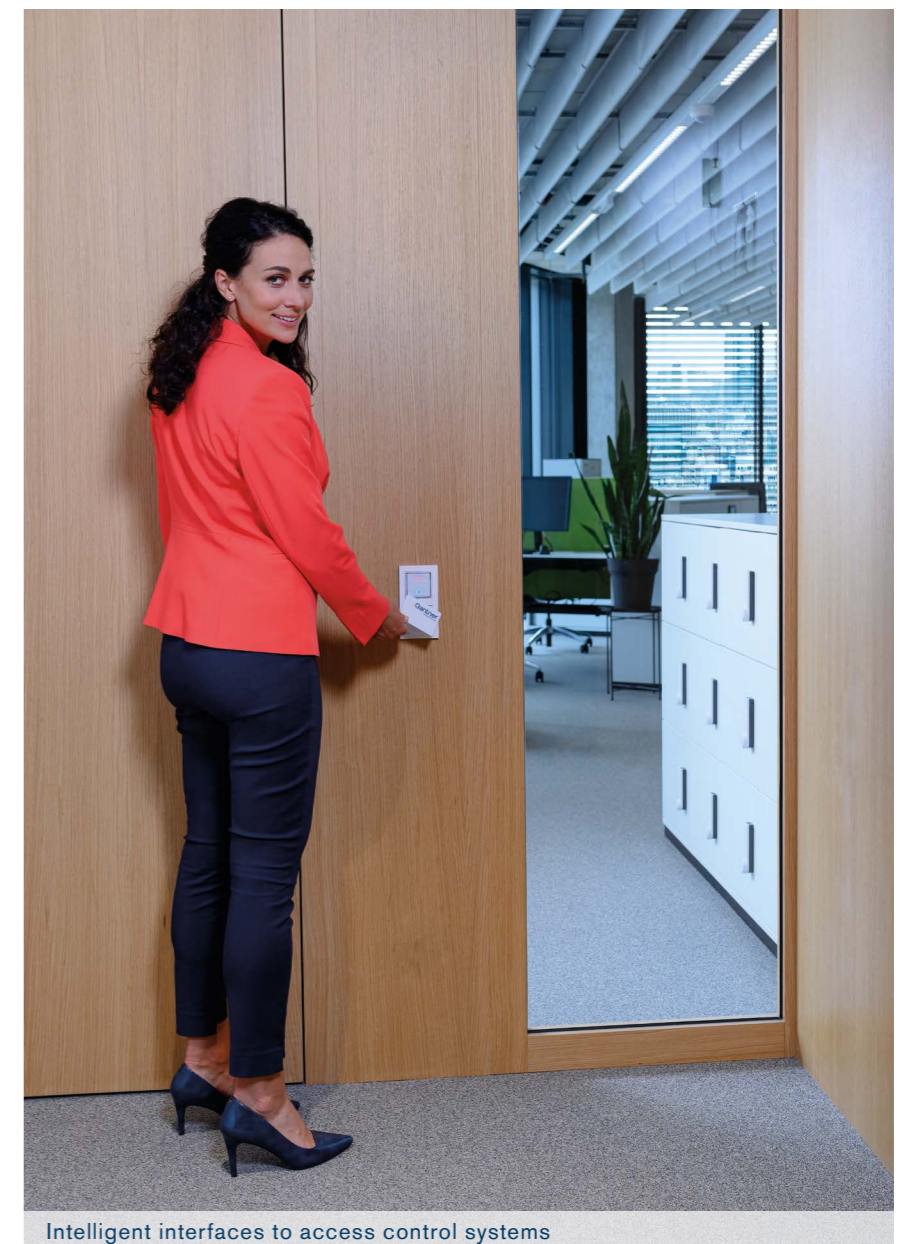

Big data

Optimize building processes with real-time data that is compliant with data protection regulations.

Green responsibility

No use of batteries and the maintenance-free operation support your green building strategy.

Intelligent interfaces to access control systems

MODERN CHANGING ROOM LOCKERS FOR MORE SAFETY AND COMFORT IN THE COMPANY

In a modern working world, employees have the opportunity to change and freshen up for work. End-of-trip facilities enable employees to use alternative means of transportations, such as bikes, to get to the office. An innovative smart locker system from GANTNER ensures that your employees' personal belongings are kept safe. It can be used intuitively and conveniently with the employee ID card or smartphone.

Easy retrofitting

Existing lockers can easily be converted to a smart locker system.

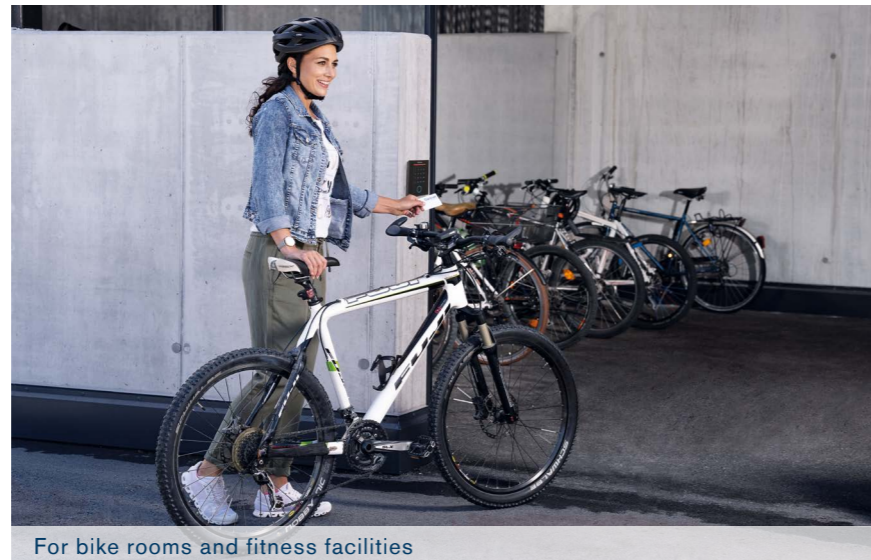

Intelligent processes

Easy cleaning and organization through automated notifications.

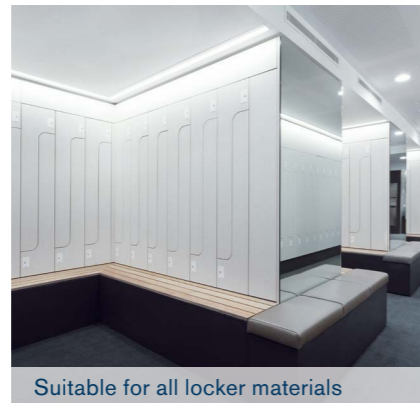

High security

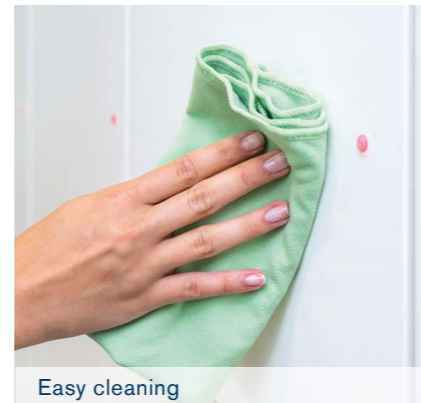

Robust mechanics and encrypted data transmission guarantee safe use.

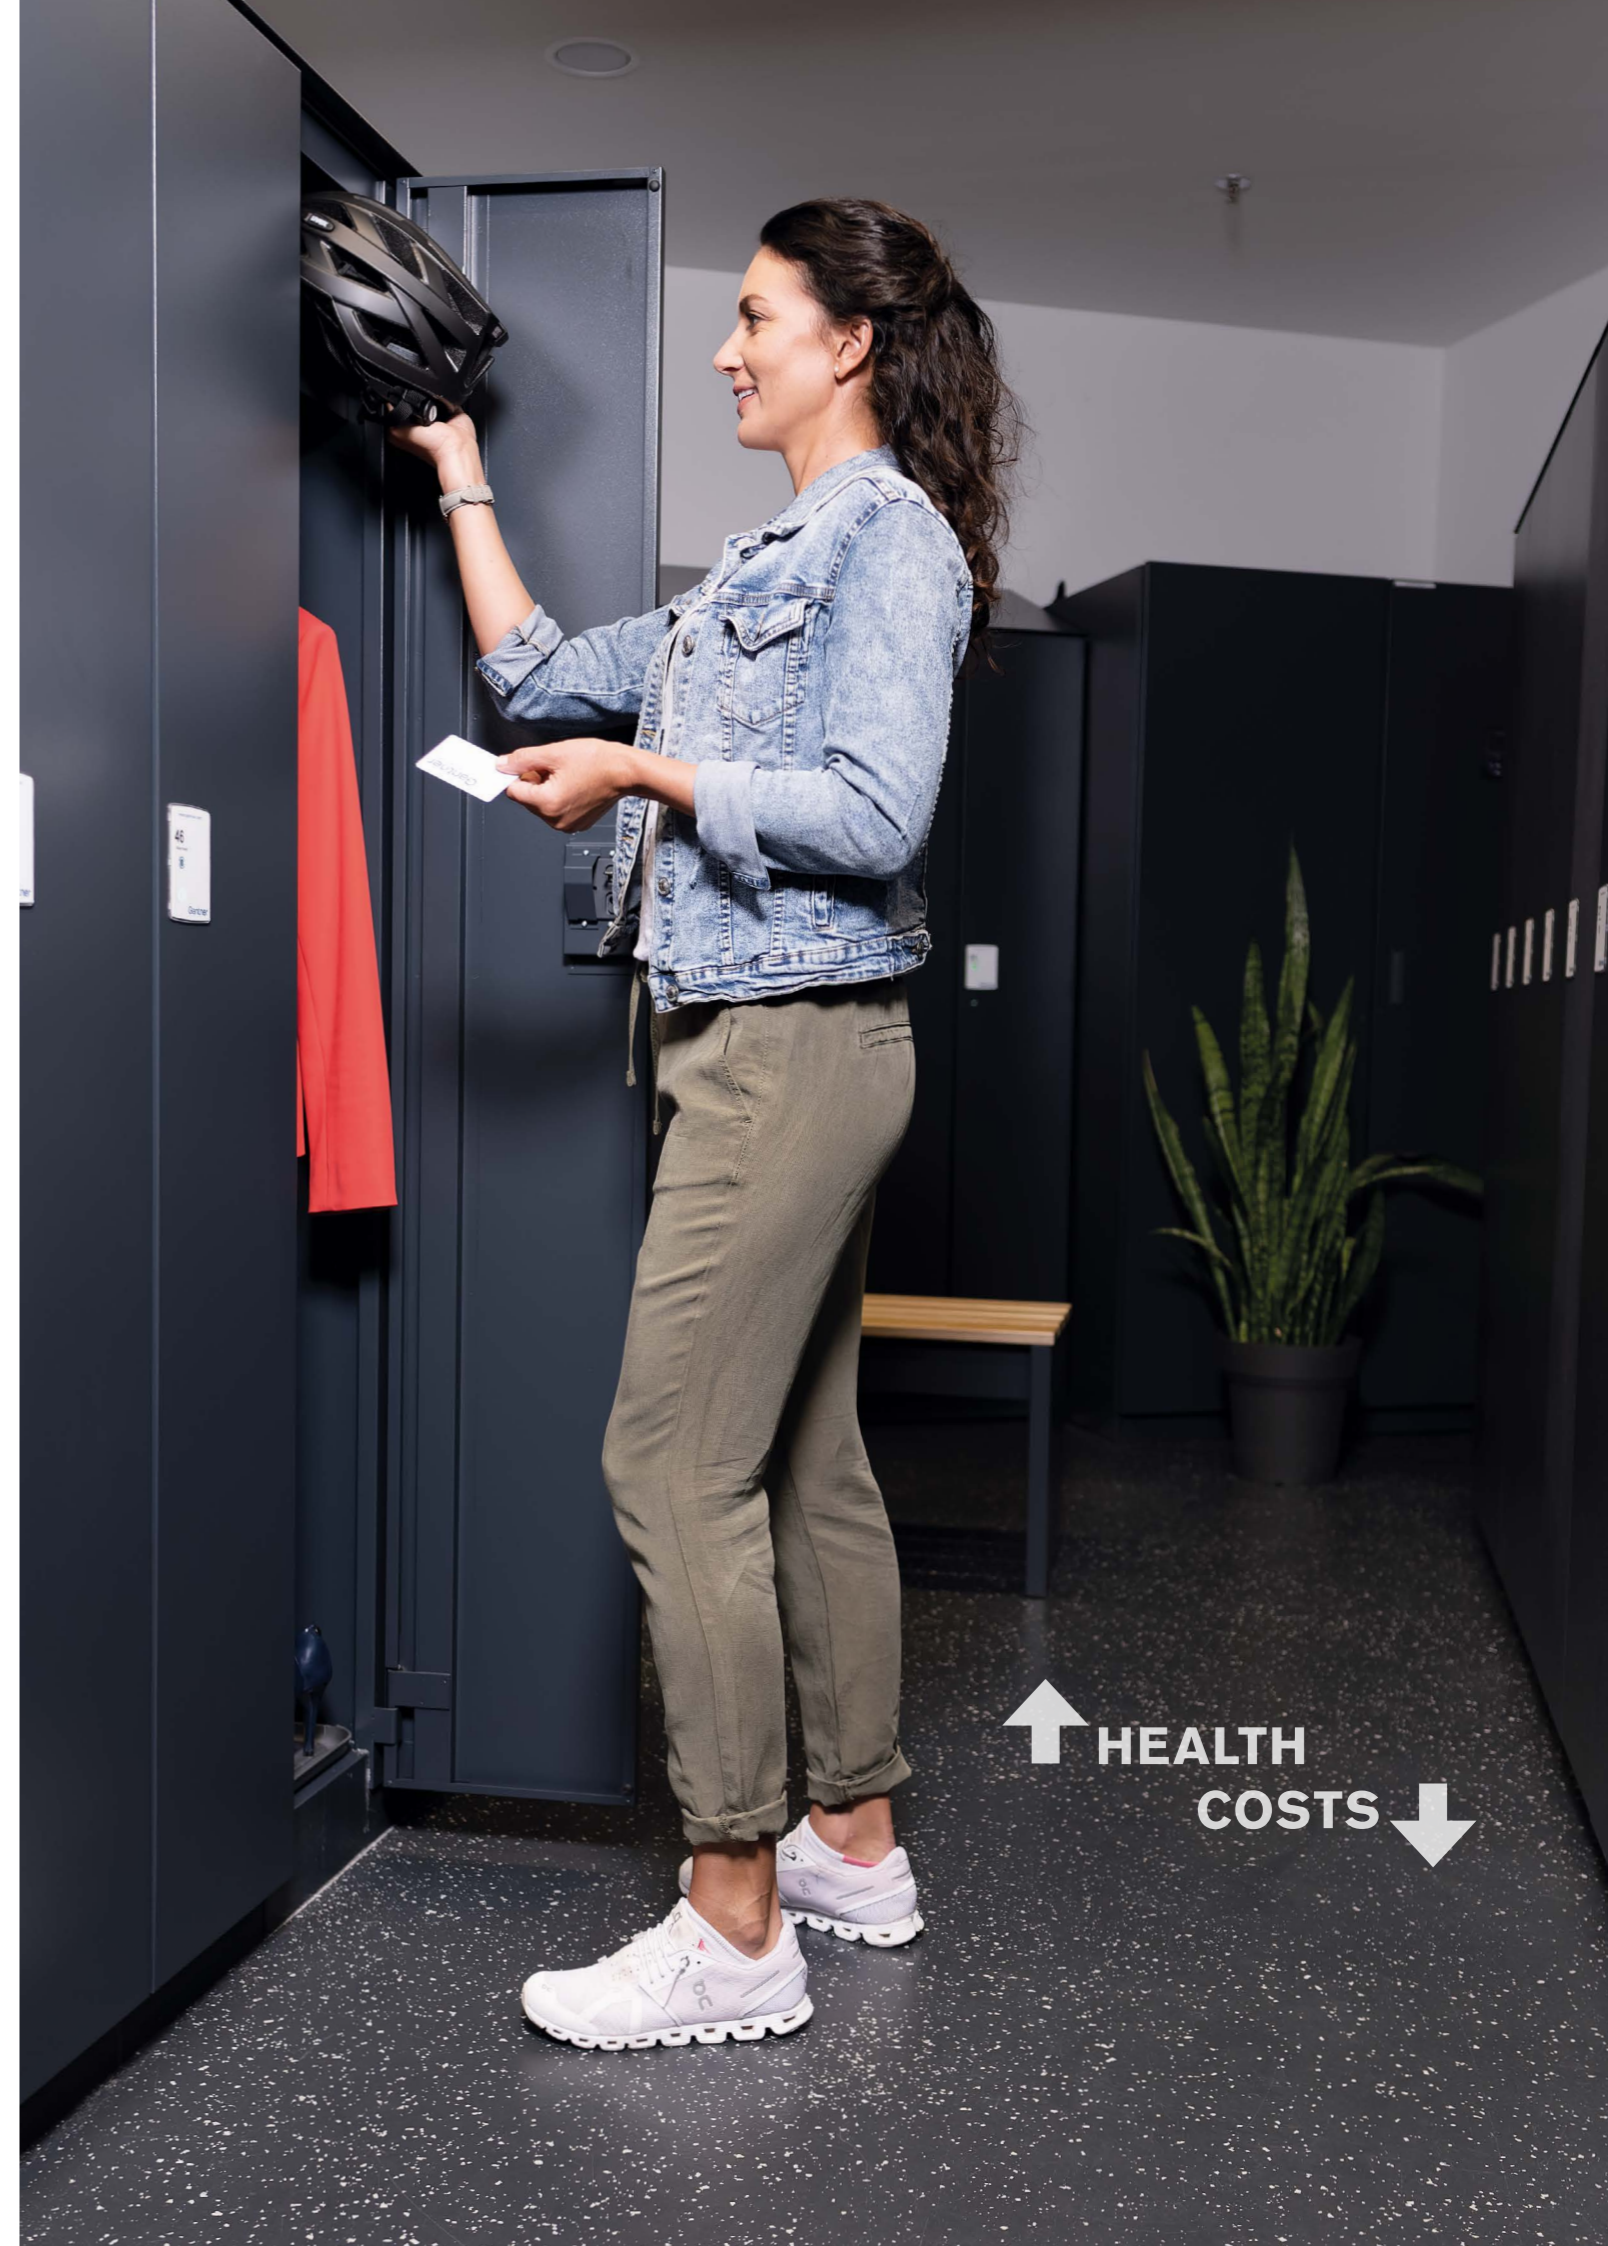

For bike rooms and fitness facilities

Suitable for all locker materials

Easy cleaning

PICK-UP

SMART LOGISTICS

LOGISTICS SOLUTIONS FOR PACKAGES, IT EQUIPMENT AND DOCUMENTS

Scalable

The logistics solution can be integrated in many locker types and is scalable to your needs.

Secure deposit

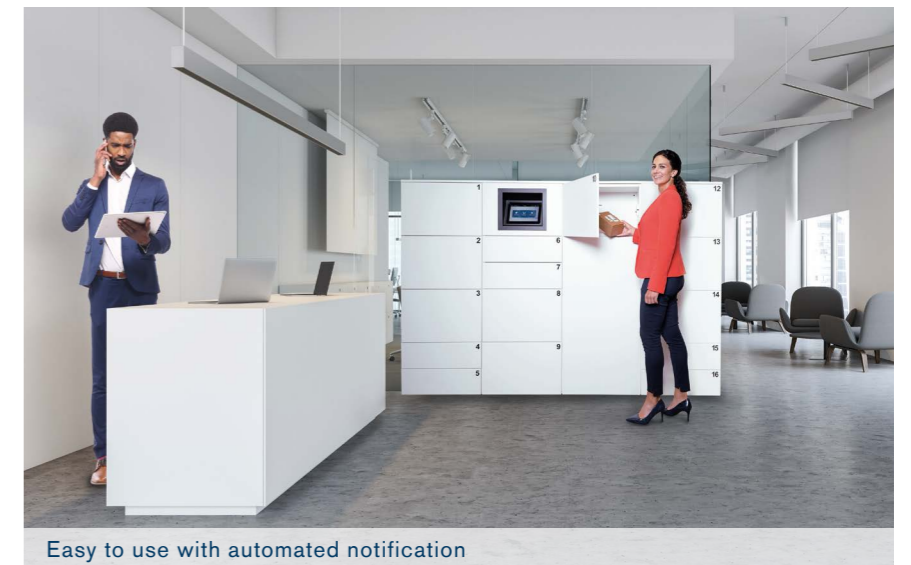

All transactions are documented, and the supply chain can be tracked.

Easy handling

Benefit from 24/7 parcel pick-up with smartphone, PIN code, or employee ID.

The number of parcels is constantly growing while the associated logistics are becoming a challenge. Smart locker systems are a safe, convenient, and easy-to-manage solution. Automate the delivery notification and the parcel tracking process. Save resources and increases the service for your employees at the same time.
