Digitalization of Leisure Facilities

Gantner – Your Partner

Founded in 1982, Gantner is a pioneer in RFID-based solutions used across various industries. Particularly in the field of leisure facilities, Gantner offers leading systems for sustainable, efficient visitor management.

From access control and smart locker systems to cashless payment options and proven ticketing solutions, Gantner provides everything from a single source.

With thousands of installations worldwide, a proven product and solution portfolio, and experienced local teams, Gantner is the leading specialist for pools, spas, and other leisure facilities.

Everything from a Single Source

Full-Service

With Gantner, you are in the best hands. Our solutions stand out through with innovation, durability, and absolute reliability.

Our partners and we accompany you from consultation, including the system design concept with our own hardware and software, right through service. We are happy to assist you worldwide.

Consultation > Design > Installation > Commissioning > Service

>> Together with Gantner, we realize projects that create significant added value for our guests and drive digitalization forward. Gantner helps us to be even more efficient and to develop new, innovative solutions together. Our cooperation stands for quality, innovation, and sustainable success. <<

Efficiently Implement Customer Requirements

Diverse Challenges

Leisure facilities such as swimming pools, water parks, and wellness centers face the challenge of efficiently managing their staffing levels while increasing the profitability of their operations.

Generating additional revenue, particularly through the sale of food, beverages, and other goods, is especially important. The purchasing experience must be simple, spontaneous, cashless. Automation is key – ideally without additional staff costs.

Today, visitors largely expect digital solutions to enhance their stay, making it as effective as possible – from online booking and cashless payment to mobile apps for special permissions and smart locking systems. Visitors are looking for a seamless solution. Modern technologies improve efficiency, customer experience, and competitiveness.

The Solution

Digital Automation

Gantner provides digital solutions for every aspect of improving a guest's experience in a leisure facility:

Ticket > Access > Lockerroom > Consumption > Payment > Exit

-  **Secure Storage Options**
For guests' belongings.
-  **Smart and Efficient**
No queues.
-  **Sustainable**
Reusable data carriers.
-  **Safe**
Prevents misuse and theft.
-  **24/7**
Always available without staff.
-  **Easy Integration**
Into any common management software.

Comfortable from the Very First Moment

Tickets and Chip Wristbands

Visitors expect a flexible and convenient way to purchase tickets both online and on-site. With our automated system, this can be easily implemented without the need of additional staff resources. Your guests can conveniently buy their entry tickets from home or directly in the facility.

Each guest receives their personal chip wristband, which can be used at all touchpoints within the facility. The wristbands are hygienic, secure, and very comfortable and will be issued at the ticket shop or the wristband dispenser.

-  **Comfort and Security**
Easily purchase tickets online and secure. Guaranteed entry without waiting.
-  **Seamless**
A comprehensive, secure solution for the entire facility.
-  **Easy Integration**
Hardware and software can be easily integrated.

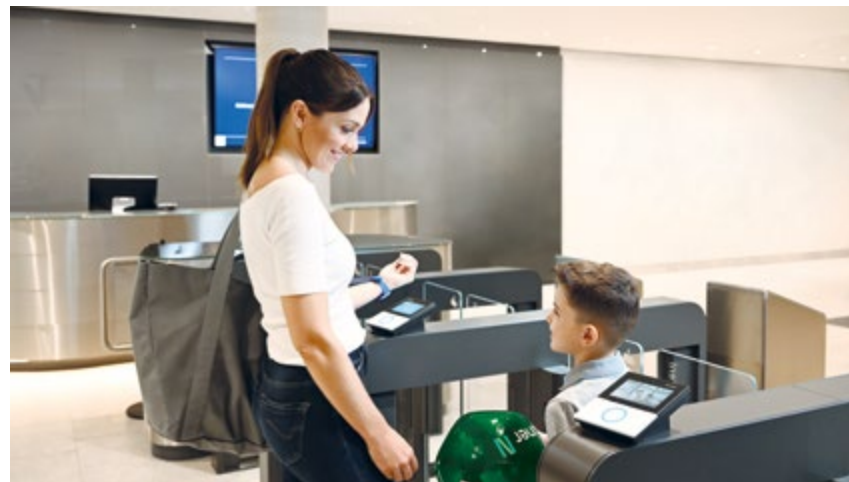

Safe and Convenient Guest Experience

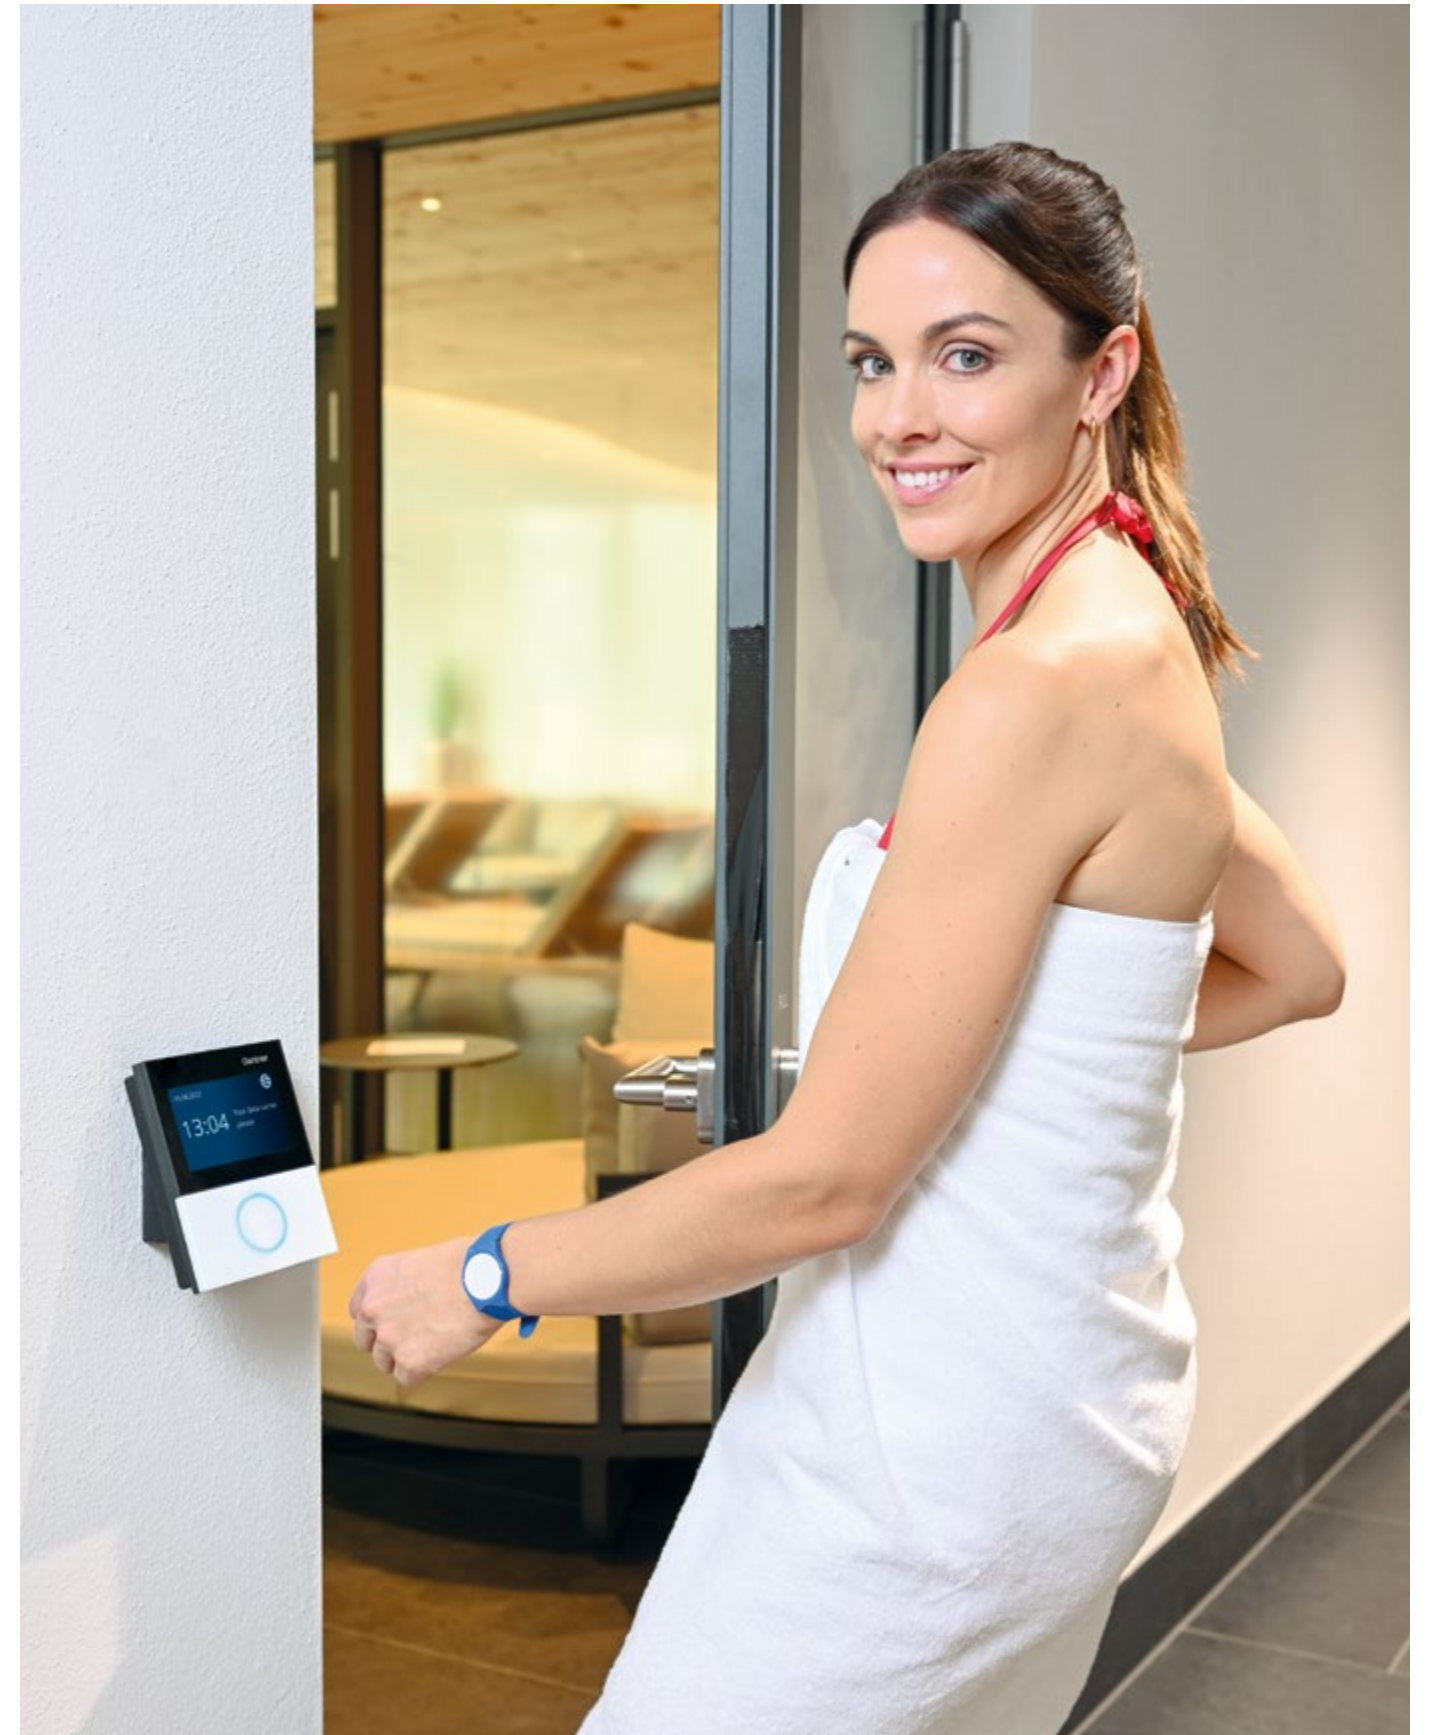

Access and Billing

Access to your leisure facility is conveniently provided through turnstiles or modern gates. Our RFID-readers check chip wristbands quickly and without contact, ensuring an intuitive and user-friendly handling. This prevents long queues, enabling fast and reliable access control.

A Gantner system can be integrated into any management software, ensuring a smooth operation. This guarantees not only accurate billing at the payment machine and the return of chip wristbands at the exit but also a secure and reliable processing of all transactions.

-  **Intuitive and Efficient**
No queues due to optimized operational processes.
-  **Secure**
Prevents misuse and ensures reliable billing.
-  **Without Staff**
Self-service solution reduces staffing needs and increases additional sales at transition touchpoints.

Safety and Comfort in the Changing Area

Smart Locker Solutions

In leisure facilities, the changing area is essential - it's the first and last impression of your facility. Comfort and security are particularly important. Smart locker systems play a central role for both visitors and operators.

Say goodbye to mechanical key management, coins, and guest using multiple lockers - our fully integrated locker solutions transform your locker rooms into a secure, comfortable, and easily manageable zone without significant administrative effort and resource usage.

 **Robust and Durable**
Secure and robust design.

 **Alarm Mode**
The integrated alarm protects operators and visitors from theft.

 **Easy Administration**
No keys and no coins; the chip wristband becomes the digital access key.

Smart locker systems are secure and convenient to lock with the chip wristbands and are easy to manage for the operator. Depending on the requirements and size of the facility, there are two versions available:

Battery-Powered Locker Systems
Ideal for retrofitting existing coin and key locks. Easy to install, low maintenance, and a battery life of up to 10 years.

Centrally Supplied Locker Systems
A completely maintenance-free solution for new or modernized leisure facilities that offers maximum flexibility and visibility.

eLoxx Suite Software Solution
Locker management made easy with the eLoxx Suite, a comprehensive offering of software solutions suitable for every requirement and facility size.

Convenient, Fast, and Secure

Cashless Payment

Boost consumption without cash: A drink at the bar, borrowing a fresh sauna towel, or paying for a soothing massage – all of this becomes effortless with our chip wristbands. Your guests simply hold their chip wristband to an integrated Gantner reader and can start enjoying right away. Cashless payment is available throughout the entire facility – allowing seamless purchases at every touchpoint. Cash remains safely and conveniently stored in the personal locker. The payment will be done at the exit on a payment machine.

Cashless payment increases spontaneous purchases, as your guests can pay quickly and easily. For operators, this means no credit card fees and no hassle with cash change. With this modern solution, you not only optimize your service but also your operational processes.

 **Additional Revenue**
Cashless payment and self-service increase spontaneous purchases.

 **Visitor Comfort**
Cash remains securely stored in the locker, and payment is conveniently made using the chip wristband.

 **Sustainable**
Reusable chip wristbands.

Software Solutions for Efficient Ticket Management

Ticketing Software for All Requirements

Simplifying processes and improving customer interactions create a unique visitor experience.

From online ticketing to self-service kiosks, Vintia's software solutions adapt to your needs and ensure smooth, fast, and automated processes – for both visitors and managers.

vintia.com

Point of Sales & Cashless Payment

Increase revenue by optimizing sales processes.

Kiosks & Info Terminals
